

COMMUNITY | ACCREDITED QUALIFICATIONS

Mitre has worked with a range of Community Trusts, Foundation and charity organisations to identify, develop and deliver education programmes to the local community.

These programmes aim to develop a range of skills and prepare individuals to enter the workplace.

The following accredited qualifications can be delivered on their own. Some may also be packaged together to create larger learning programmes.

Customer Service

Employability Skills (various themes from admin to sport to construction)

Introduction to Enterprise Skills

Event Security Operations

Fitness, Nutrition and Leadership in Sport

Functional Skills in Maths and English

Health, Safety & Reducing Risk in Sport

Sports Leadership Skills

Sports Leadership, Health and Fitness

Team Leadership

COMMUNITY | ACCREDITED QUALIFICATIONS

Delivery and Assessment

These qualifications are delivered through a combination of practical and classroom activities. Candidates are assessed through a variety of methods including workbooks, practical demonstration, group work and tutor observations.

Funding

Funding may be available via our access to Government Funding, meaning we can keep the costs of the programme as low as possible for the individuals taking part. Where funding is not available or the candidate is not eligible, competitive rates are offered. Where our partners deliver, we simply charge for the provision of workbooks and our quality assurance, registration and certification services.

Tailored Courses

These programmes represent our most popular community education courses and can add value to a range of programmes and projects. However, where an organisation has a specific community project they are implementing and would like a more tailored accredited programme, we can work closely with you to identify and design a more suitable course. This way, your programme can still be accredited but bespoke to you and your candidates.

Partnerships

We welcome partnership working and would be delighted to develop new partnerships to deliver these programmes across the UK.
